

Interlake Meeting Notes  
From  
September 10, 2005

First, apologies for the long wait for these. Some glitches are just more difficult to overcome than others.

DNR representatives from the Division of Outdoor Recreation; Nila Armstrong and Emily Kress, met with approximately 20 persons at 8:30 Saturday morning at the parking area. Updates on the following were given:\

- \*CRR or capital funds for the division were approved by the Budget Committee in August. Of the total amount, \$175,000 was slated for Interlake.

- \*The Division of Engineering will prepare bids for a boundary survey to be paid for from those funds. (Bids have been let and contractor selected)

- \*Control points are now in place for contour mapping by the Division of Reclamation. The work to be done requires 2 foot contours.

- \* The message board was up and adorned in time for the successful clean-up in June. Many thanks to those who volunteered and helped complete this project.

- \*Interlake is being discussed as a site for dog trials conducted on horseback yet this Fall. General consensus was that this was a big playground and those who wish to play should come and be represented at the table as discussions are held before decisions made about activities permitted and where when facility opens. Any new information will be forwarded to WCRD.

- \*Short discussion on interior road closures to allow all to use. Anyone without a valid driver's license-regardless of age-is NOT permitted to ride on a public road.

- \*Dam update—working to get a DNR engineer to inspect and direct the work.

Next update meeting was suggested in February. Plan then to set the next work day. Another “clean up” item besides trash is removal of exotic species. A number of Tree of Heaven trees and other invasives were spotted around the parking area.
